SUGGESTIONS for a CRYSTAL GALLERY or NEW PALACE of GLASS for COMBINING the INTELLECTUAL TALENT of ALL NATIONS; or a Sketch of a Practical Philosophy of Education.
By W. CAVE THOMAN, Master of the North London School for Drawing and Modelling.
DICKINSON, BROTHERS, Publishers, 114, New Bond-street; and MARCHANT, SINGER, and CO., Ingram-court, City.

On Saturday, January 8, 1852, will be published, price 2d., the First Number of a New Series of THE ILLUSTRATED EXHIBITOR, under the title of

THE ILLUSTRATED EXHIBITOR and MAGAZINE OF ART.

This work, though published at so small a price, will greatly surpass every thing that has yet appeared, even at double or treble the sum. The Engravings will form a Gallery of Fine Art. The first artists in the world will be employed upon them and the printing and all the details will be executed with the greatest care, a new Printing Establishment being fitted up expressly for the purpose of bringing out this New Series of THE ILLUSTRATED EXHIBITOR. The First Number will be ready with the Magazines for January, 1852. Monthly Parts, 8d.; or, when Five Numbers, 1s6d. each.

THE ILLUSTRATED EXHIBITOR AND MAGAZINE OF ART.

will not only form a Gallery of Pictorial Illustrations, but will also contain ably-written articles on a variety of subjects interesting and instructive to all classes, arranged under the following heads:—

I. WORKS OF THE GREAT MASTERS.
Copies of the most celebrated works of the great masters of all nations in painting, sculpture, and other branches of art.

II. THE PORTRAIT GALLERY.
Which will be enriched with biographical sketches and reminiscences. The portraits will be engraved with the greatest care by first-rate artists; and, together with the biographies, will prove of deep interest and profit.

III. HISTORICAL EVENTS.
Each article will be accompanied by a splendid engraving. As the most striking events in the history of other nations, as well as our own, will be included, this will prove a medium for the communication of much valuable and instructive information.

IV. ARCHITECTURE.
This department will comprise the finest specimens of the architecture of Europe, including the cathedrals and other ecclesiastical buildings of England and the continent, Norman castles, noble residences, public institutions, and other buildings possessing claims to architectural taste and beauty.

V. SCIENTIFIC DISCOVERIES, INVENTIONS, AND IMPROVEMENTS.
This department will embrace a vast range of subjects; and the articles will be written in the clearest and most practical style, and illustrated and explained by a number of suitable diagrams and engravings. It will be deeply interesting to all who desire information on such subjects, but especially to youthful artisans and mechanics.

VI. THE WORKSHOPS, MANUFACTORIES, AND LABORATORIES OF ENGLAND AND THE WORLD.
In this department one grand object of the recent Exhibition of the Industry of All Nations will be fully carried out, namely, the development of the faculty of invention. It will include minute descriptions of the processes by which the various raw materials with which the earth abounds are made to supply the necessities, and to minister to the comforts and elegancies of life. The pictorial illustrations will be numerous, and the descriptions will be written in an educational style, such as to convey instruction and entertainment to families and general readers.

VII. LOCAL AND DOMESTIC SCENES.
These will include some of those events which occur in cities, in towns, and in familiar life, which are well deserving of notice, and which admit of beautiful pictorial illustration. Such are national commemorations, the internal arrangements of Government establishments, scenes in domestic life, &c., &c.

VIII. REMINISCENCES OF THE GREAT EXHIBITION.
Comprising of Pictorial and Literary Illustrations of its most interesting objects in Art and Science for which space could not be found in Volume the First. Although the ILLUSTRATED EXHIBITOR contains a larger and more choice collection of the valuable contributions to the World's Fair than has been ever before attempted, yet the various and unique subjects still to be introduced will be found worthy the reader's best attention.

IX. THE LADIES' DEPARTMENT.
This curious and useful portion of the work will be under the superintendence of one of the principal *femmes d'esprit* of the day, and will be made peculiarly acceptable to female readers, as it will be accompanied by a series of illustrations of the most novel and elegant designs in embroidery, and every kind of ornamental needlework the latest fashions in dress, &c., &c.

It must be obvious to the most casual observer, that the specimens of art and manufacture recently collected in the Great Exhibition of the Industry of All Nations have wonderfully improved the taste of all classes of the community, and have inspired them with a love of the beautiful, and a desire to excel, which no lecturer, or books, however well written, could possibly have done. The object of THE ILLUSTRATED EXHIBITOR AND MAGAZINE OF ART will be to combine lucid writing and pictorial illustration, addressing itself at once to the understanding and the eye. And should this New Series, published as it will be at so low a price, answer the description given in this Prospectus, it will evidently be the greatest literary undertaking of the present day. The briefest out of each Weekly Number will involve a large outlay, but JOHN CASSELL relies with confidence on the support of all classes of the community; he believes that this big publication will be truly National in its character, and will secure not fewer than 200,000 subscribers.
